## Articles and Speeches

[Eric Mayer — NPR Interview](#)

November 2016 – Speaker: "eDiscovery in Your Case" TexasBarCLE

## Wins

In the first six months of 2011, Mayer obtained multimillion dollar settlements for two separate clients. The terms of the settlements are confidential. In one of the settlements, Mayer's client did not even have to file suit. Its claims were settled in a series of pre-litigation mediation sessions. This method of dispute

resolution saved Mayer's client both time and money and allowed it to move on to more productive business. To learn more about this, please contact Eric Mayer at 713-653-7853.

In August 2008, the Texas Supreme Court held in a 7-2 decision that Zurich American Insurance Company, Federal Insurance Company and National Union Fire Insurance Company had a duty to defend Susman Godfrey's client, Nokia, Inc, in a series of class actions pending around the U.S. The ruling is a vindication for Nokia which has spent millions successfully defending these claims. Nokia hired Susman Godfrey partner Eric Mayer after losing on this issue in the trial court. Mayer and Susman Godfrey lawyers Brian Melton, Ian Crosby and Lexie White argued that Nokia's insurers wrongfully denied coverage. The ruling by the Texas Supreme Court now opens the way for Nokia to recover millions in defense costs and fees from this group of insurers. Mayer argued the appeal for Nokia. [Click here](#) to read the Texas Supreme Court's opinion. [Click here](#) to watch excerpts of Mayer's oral argument before the Texas Supreme Court.

In July 2008, Mayer successfully argued and won the appeal in a Texas-wide class action against The Hertz Corporation in connection with the company's rental car fuel-service charge. The class consisted of tens of thousands of class members and Plaintiffs alleged millions of dollars in damages. The Court of Appeals for the Thirteenth District Court of Texas reversed the trial court's class certification order and decertified the class on all claims. This victory will serve as persuasive authority in similar cases around the country.

In 2007, Mayer along with Steve Susman and other partners at Susman Godfrey represented a coalition of Texas cities and counties opposing the construction of a series of coal fired power plants in Texas. Permits for those proposed facilities have now been withdrawn by the applicant, representing a significant victory in this environmental dispute. Mayer's efforts and the efforts of other Susman Godfrey lawyers have been recognized by the National Law Journal which awarded Susman Godfrey its 2008 pro bono award for work on this groundbreaking case. In 2006, Mayer successfully represented Gaperti SRL of Italy in trademark litigation in Houston, Texas. Mayer's client not only obtained a complete dismissal of all claims filed against it but also obtained funds from the plaintiff to compensate it for attorney fees and costs incurred in the litigation.

In Fall 2006, Mayer's client, Nokia, obtained insurance coverage against a host of insurers for costs and fees expended by Nokia in defending class action litigation in a variety of state and federal courts.

In the Summer of 2004, Mayer represented Unocal in a five week commercial arbitration concerning gas supply to a fertilizer plant located in Kenai, Alaska. Unocal prevailed on 14 of 16 issues of arbitration.

In the Spring of 2003, Mayer represented an executive in connection with his severance from a Greenwich Connecticut hedge fund. Upon the completion of discovery of the officers involved in the termination, the case settled resulting in a confidential payment to Mayer's client.

In 2004, 2003, and 2002, Mayer successfully handled a variety of insurance coverage matters. One of these disputes recently settled, resulting in multimillion dollar payments to Texas Instruments, one of Mayer's clients.

In 2000, with Randy Wilson, Mayer defended Unocal Corporation against a \$15 billion lawsuit brought by Argentina oil and gas company Bridas Corporation in connection with a pipeline across Central Asia. Following extensive briefing and an evidentiary hearing, the trial court dismissed the suit in Unocal's favor.

In 1998, Mayer represented two former executives in connection with severance payments after their termination. The case was arbitrated to a single arbitrator and Mayer's clients received multi-million dollar awards. Confidentiality agreements prevent a more thorough discussion of the case.

In 1998, Mayer with the assistance of Geoff Harrison, successfully defended the Hertz Corporation in a high profile jury trial in which the plaintiff alleged violations of state insurance licensing laws and unfair and deceptive practices. In less than an hour of deliberations, the jury found for Hertz on all issues and awarded plaintiff's attorneys zero in attorney's fees. Earlier in August 1997 Mayer successfully defeated plaintiff's motion to certify the case as a class action.

In 1996, with Steve Susman, Mayer defended Texas Instruments in a case filed by Samsung alleging fraud in a 1990 cross license agreement. After a three week trial in Fort Bend County, the parties settled by entering into a new agreement that will pay Texas Instruments approximately \$1.1 billion over its term.
