Re: Chemjet case

Dear Johnny,

I want to apologize for taking so long to send you this letter. For the past year I have been extremely busy, and my letter writing has been limited to urgent deadlines (which this letter deserved long ago).

It was a pleasure working with you, Rob, and Colin on Chemjet's anti-trust and tortious interference case. As you know, the case required immediate attention and action, which each of you gave to the case. I believe that the strategic decisions made by you and the team, in consultation with David and me, were the right decisions which resulted in expediting the state and federal district court cases. Following our initial meeting, it was clear that the Susman team that you assembled, understood the case. The team immediately took steps to secure evidence and recommend an expert witness, which we hired. The motions, hearings, and mediations that followed brought the case to a relatively quick conclusion. The team's superior briefing deserves special recognition. It is very seldom that I review draft pleadings, motions, responses, and briefs of other lawyers where I have very few or no comments or changes, but that is what I enjoyed when reviewing the drafts that you, Rob and Colin prepared. I also appreciate that I received the drafts well in advance of the filing deadline.

Please share this letter with Rob and Colin so that they know that I sincerely appreciate their contributions to the case. After working with you, Rob and Colin for a little over a year, I consider each of you a friend. Maybe next time we decide to all have dinner, we should talk to David about someplace closer to home than New Orleans.

I look forward to being able to work with you, Rob and Colin in the future, and will recommend each of you to others. Lastly, please give my thanks to Linda King for referring us to you.

Best regards,

Thomas R. Bray
General Counsel
